PROFILE

Aspiring software engineer with a robust foundation in Python, Django, SQL, HTML, CSS, JavaScript, ReactJS, and Node.js. B-Tech graduate from Shree L.R Tiwari College of Engineering. Proven track record in projects like Advanced Self-Control Burner, ChatScribe 3D Animated website, UsabilityHub Clone. Strong problem-solving skills and a thirst for learning make me a dedicated and versatile candidate, eager to contribute to innovative projects.

HOBBIES

"Passionate about coding, I dedicate my free time to exploring new technologies and building projects that expand my skills and understanding of software development."

Carrom

EDUCATION

Shree L.R Tiwari College of Engineering

June 2020 – May 2023

B-Tech

Thakur Polytechnic

April 2018 – May 2020

Diploma in Mech

SKILLS

Python, Django, SQL, HTML5, CSS, JavaScript, NodeJS.

MAJOR PROJECTS

Advance Self Control Burner.

"Based on C++. Designed an advanced self-control burner utilizing smoke sensor technology, showcasing my innovation in smart appliances and ability to create practical solutions."

ChatScribe (Python).

Designed a custom AI personal assistant utilizing OpenAI's API and Python, featuring conversational abilities with both speech and text responses. Implemented automatic data storage for question and answer pairs in user-friendly folders.

UsabilityHub Web Clone.

"Engineered a faithful clone of UsabilityHub's website, underscoring my proficiency in front-end technologies and attention to replicating intricate design and functionality."

MINOR PROJECTS.

There are many Minor projects which I have build using APIs such as Image Search Engine, Weather Api, Quiz App, Quote Generator, Email Validation using Python.
